NOW Journal 03/2016

Dear Sir or Madam,

There certainly was a lot of activity in the short month of February – no matter if in Berlin, Bochum or Offenbach. In this month's NOW Journal read about what events attracted which visitors. The momentum continues in March too: for example, at the third specialist conference of the BMVI in Aachen where there will be a focus on municipal topics in the area of electromobility.

Take a look at the schedule of the two-day event and also look forward to test-driving a vehicle while there. Directly thereafter, attention will shift to Berlin where the Hydrogen and Fuel Cell Technology Marketplace will similarly take place for the third time.

One could say that all good things come in threes – but with fresh wind in the sails of the NIP and also in the subject of electromobility funding guidelines it can happily be assumed that more of such successful events are set to follow. In any case, we're looking forward to having you on board!

Best regards,
Your NOW Team
