NOW Journal 04/2016

Dear Sir or Madam,

As part of the “On-site Electromobility Specialist Conference”, the BMVI made its second call for funding applications based on the current electromobility funding guidelines. The 2016 call for funding applications focuses on submissions for the procurement of electric vehicles in a municipal context and associated measures for the establishment of publically accessible recharging infrastructure as well as the development of municipal electromobility concepts.

In follow-up to the “On-site Electromobility Specialist Conference” and “NIP Supplier Marketplace” events, charts presented on these occasions can now be downloaded (in German only). And don't miss the special report on the general assembly of the Clean Power Net.

On 12.4.2016, the high-level “H2 Mobility Congress” is taking place at the BMVI. Register your participation via the NOW website.

Happy reading!
