New hydrogen station in Wolfsburg

Berlin/ Wolfsburg, 27 March 2018 – Lower Saxony has been officially added to the German hydrogen (H2) map: the CEP partner Air Liquide today officially inaugurated its H2 filling station in Wolfsburg, which has been in operation since August – the first in this German federal state. The station is one of the first 50 filling stations to be built all over Germany as part of the Clean Energy Partnership (CEP) and with funding from the Federal Ministry of Transport and Digital Infrastructure (BMVI) ...

Funding approval for Lechwerke: Direct current fast-charging stations for motorways and arterial roads

Lechwerke (LEW) is the largest operator of public charging infrastructure in the Bavarian-Swabia region with currently around 150 charging points for electric vehicles. In 2017, the Lechwerke developed a spatial concept for the region that is intended to once more significantly increase charging possibilities, especially in the area of direct current fast-charging technology ...
