NOW Journal 06/2016

Dear Sir or Madam,

Helping electric mobility to achieve its breakthrough is a declared goal of the federal government. In May, cabinet adopted the electric mobility support programme. Within its scope, a funding guideline for the expansion of publically accessible recharging infrastructure is also being developed. In addition, Federal Minister Dorbrindt handed over the first 96 funding approvals for regional projects for the expansion of electric mobility in municipalities and cities. Fittingly, the Electromobility Roadshow is actively touring through Germany – its last stops being in the states of Bavaria, Saxony and Hesse.

On 5-6 July, the “German Hydrogen Congress” is taking place for the seventh time at the Representation of the State of North Rhine-Westphalia in Berlin. Furthermore, the opening of several hydrogen refuelling stations is also scheduled.

And on the occasion of Environment Week at Schloss Bellevue in Berlin, NOW will be on site and is looking forward to your visit on 8 June from 1:00pm. All that is required for entry is your personal ID.

Best regards,
Your NOW team
