NOW Journal 07/2016

Dear Sir or Madam,

This month NOW was distinguished by the European association for the promotion of cogeneration (COGEN) with the Europe Recognition Award 2016 for the successful implementation of the Callux lighthouse project. In Wuppertal on 15 June, the first H2Mobility hydrogen refuelling station went into service – representing a milestone towards the realisation of a national hydrogen refuelling station network in Germany.

The EFBEL accompanying research project has presented its results that highlight the demands that will be placed on innovative bus drivetrains of the future. And the Electric Mobility Roadshow made stops on Bicycle Day in Brunswick and on the Sixth Day of E-Mobility at the Technical University of Ingolstadt.

Read more about these subjects and other news in the latest issue of the NOW Journal.

Best regards,
Your NOW team
