### **New programme funds LNG in maritime navigation**

The Federal Ministry of Transport and Digital Infrastructure (BMVI) is funding the equipping and retrofitting of seagoing vessels for liquefied natural gas (LNG) as a marine fuel. The goal of the new funding programme is to advance the use of LNG in German maritime navigation. Funding will be made available from the Mobility and Fuel Strategy (MKS) ...

### **96 new recharging points for northern bavaria**

Green light has recently been given for funding for the development of new recharging infrastructure projects for two applications from Würzburg and Nuremberg. With funds from the Recharging Infrastructure Funding Guideline (Förderrichtlinie Ladeinfrastruktur), a total of 96 new recharging points will be established in northern Bavaria. On 9 August 2017, Alexander Dobrindt, Federal Minister for Transport and Digital Infrastructure, handed over a funding approval notice for 233,000 euros to Nuremberg-based company N-ERGIE AG ...

### **MS innogy: Excursions are becoming greener**

The excursion vessel MS innogy is the first passenger ship in Germany to operate with an environmentally-friendly methanol fuel cell. The energy required for its entire operation comes exclusively from renewable sources, producing no environmental pollution. The ship has now been christened on Essen's Lake Baldeney and assigned to regular passenger service ...

### **DWV parliamentary evening in Erfurt**

Hydrogen and fuel cells must be part of the energy system of tomorrow, in Thuringia too – and not just in road transport. That was the consensus at the end of a parliamentary evening hosted by the German Hydrogen and Fuel Cell Association (Deutsche Wasserstoff - und Brennstoffzellen-Verband (DWV)) in cooperation with IHK Erfurt on 23 August in Erfurt ...
