### NOW symposium showcases alternative energy systems for sustainable shipping

How drive technologies with liquefied natural gas (LNG), batteries or fuel cells can be used for clean shipping and how ships can be supplied efficiently and emission-free with energy – that is the topic under discussion by experts on 4 September 2018 in Hamburg at the NOW symposium “Zero Emission Shipping – alternative energy systems for sustainable shipping” in the framework of the international leading trade fair of the marine industry, SMM 2018 ...

### The Starterset Elektromobilität (electric mobility starter set) assists in the search for the most suitable programme of support

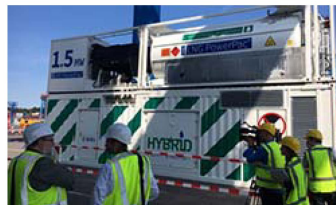

The federal government is supporting the transition to sustainable electric mobility in various departments. The Starterset Elektromobilität (electric mobility starter set) of NOW GmbH now provides an overview of all federal subsidies in this area. A filter function on the Starterset Elektromobilität allows the website visitor to conduct a targeted search for specific funding areas such as for vehicles, infrastructure, research & development as well as concepts ...

### Mobility and Fuel Strategy pilot project funding: environmentally friendly energy for container ships in ports

An LNG PowerPac® from technology supplier Becker Marine Systems is now supplying 15,000 and 20,000 TEU Hapag-Lloyd container ships at Hamburger Hafen und Logistik AG (HHLA) Container Terminal Burchardkai with environmentally friendly power during berthing periods in port. HHLA and Hapag-Lloyd are thereby intensifying their efforts to help keep Hamburg's air clean ...
