NOW Journal #5 – March 2022

New website bundles knowledge on standardisation of hydrogen and fuel cell technologies

The topic of standardisation in the field of hydrogen and fuel cell technology is complex, internationally oriented and is subject to continuous development. Until now, there was no central platform dealing with the 'Regulations, Codes & Standards' (RCS) issue for these technologies. This gap has now been bridged with the launch of the new website:

www.rcs.now-gmbh.de by NOW GmbH ...

Hydrogen mobility in Emsland: HyExpert region presents concept

The district of Emsland is regarded throughout Germany as a pioneering region in terms of developing a climate-friendly hydrogen economy. The completion of the HyExpert concept now signifies another milestone. The feasibility study "HyExperts: Emsland H2 region" was funded in the framework of the HyLand competition by the Federal Ministry for Digital and Transport (BMDV – Bundesministerium für Digitales und Verkehr) in the amount of €300,000 ...

First fully-electric trucks from Mercedes Benz are deployed at logistics companies

Mercedes Benz Bank AG is one of the first recipients of subsidies as part of the funding guideline of the Federal Ministry for Digital and Transport for alternative, climate-protecting drives and associated refuelling and charging infrastructure (KsNI) for light and heavy commercial vehicles. With the help of the subsidies, 46 battery-electric series production Mercedes-Benz eActros will be presented to logistic companies, Dachser and DB Schenker, at particularly favourable terms ...
