## NOW Journal #16 – August 2023

### Two projects for efficient large-scale production of fuel cells

As part of the 'TiKaBe' project network, Fraunhofer ISE is developing innovative catalyst inks that can be used for various industrial coating processes. Shortening and simplifying the so-called 'break-in', or the initial conditioning of fuel cells, is the focus of the research project: 'BI-FIT' ...

### HyStarter completed – Eichstätt region presents results report

After around 18 months of the project's duration, the official final event of the HyStarter region of Eichstätt took place at the beginning of August. 30 delegates from the district of Eichstätt, comprised of stakeholders from business, municipal politics and the district's administration, made their way to Wunsiedel in Upper Franconia ...
