Hydrogen test field opened in the Port of Hamburg

Hamburger Hafen und Logistik AG (HHLA) today opened the first test field for hydrogen-powered port logistics and its hydrogen refuelling station in the Port of Hamburg. The test field at Container Terminal Tollerort (CTT) represents another milestone in decarbonising logistics. Together with its partner companies in the Clean Port & Logistics Cluster (CPL), HHLA is now testing in operation how hydrogen can be reliably used to supply heavy goods vehicles ...

Regional H2 clusters: The hydrogen ramp-up requires domestic value chains

At its meeting on 21 June 2024, the National Hydrogen Council (NWR) issued a new position statement on the importance of regional hydrogen clusters. The NWR emphasises the advantages of these clusters, particularly in the context of the transformation in the regions and strengthening the resilience of the energy system ...

Hydrogen Acceleration Act: Setting the course for continued improvement of the hydrogen ramp-up

To further advance the development of the hydrogen infrastructure along the entire value chain in Germany, it is essential that the necessary foundations are laid in the legal framework and that many different areas of legislation are effectively interlinked. The National Hydrogen Council welcomes the draft Hydrogen Acceleration Act and sees it as an important milestone on the path towards accelerating the development of the hydrogen economy, but also sees room for improvement ...
