Evaluation report on funding support for climate-friendly commercial vehicles

With the KsNI funding guideline, the BMDV supported companies in purchasing climate-friendly commercial vehicles and charging infrastructure from 2021 to 2024. An external report has now confirmed that the KsNI funding programme resulted in a statistically significant increase in the share of climate-friendly commercial vehicles in all vehicle classes N1 to N3 ...

The public charging network needs the municipalities

The public charging infrastructure for electric vehicles is making considerable progress. With almost 160,000 publicly accessible charging points, around 1.7 million fully electric cars and 960,000 plug-in hybrids are currently supplied. In his article for the current issue of the magazine "Stadt und Gemeinde digital" (2/25) of the German Association of Towns and Municipalities (DStGB), Conrad Hammer, National Centre for Charging Infrastructure at NOW GmbH, describes the central role of local authorities in the expansion of the charging network.
